Profile

Computer Science student at AAB University, ambitious and adaptable. Deeply passionate about full-stack development and mastering new technologies. Experienced in web, mobile, game development, AI, and IoT projects with strong public speaking and team leadership skills. Dedicated to delivering efficient, clean, and highly usable solutions. Eager to contribute to open-source communities and deliver impactful results.

Education

Bachelor of Computer Science – Professional Programming, AAB University 2023 – 2026
Prishtina, Kosovo

- GPA: 9.9 / 10
- Recognized for academic excellence and offered early job opportunities.

Skills

Programming Languages

Python, Java, Kotlin, C#, C++, JavaScript, Swift, PHP, SQL, TypeScript

Frameworks & Tools

React, Node.js, Next.js, Unity, .NET, Tailwind CSS, phpMyAdmin, NeonDB

IDEs & Platforms

Android Studio, Xcode, Visual Studio, VS Code, PyCharm, Cisco Packet Tracer

Expertise

Full-Stack Development, API Integration, IoT, Game Development, Database Design, Networking

Project Experience

EG electronics

E-Commerce Platform (Paid Client Project)

- Developed a full-stack e-commerce platform using React, TypeScript, Node.js, and Neon (serverless PostgreSQL).
 - Implemented core features including product management, shopping cart, user authentication, and order processing workflows.
 - Designed responsive, user-friendly interfaces optimized for desktop and mobile devices.
 - Collaborated directly with the client to gather requirements, implement features, and resolve issues.
- Delivered a production-ready solution aligned with business and customer needs.

AI Chatbot with Gemini API

- Full-stack chatbot using Python (backend) and HTML/CSS/JS (frontend)
- Integrated Google's Gemini API for real-time conversations
- Learned API integration and async programming

Online Voting System

- Secure platform built with PHP, phpMyAdmin, HTML, CSS, JS
- Managed sessions, user validation, and database logic

3D Survival Game in Unity

- Created a game using C# and Unity
- Designed game logic, UI, and time-based objectives

Psychologist Scheduler Web App

- Built with React, Node.js, Next.js, and NeonDB
- Enabled booking, login, and persistent storage

Fake News Detection Platform

- Full-stack with C#/.NET backend and React + Tailwind frontend
- AI-powered credibility scoring, real-time interaction design

IoT Drone Project

- Built drone control system using Python, MicroPython
- Web interface controlled logic and balancing algorithms
- Gained embedded and hardware/software integration skills

Languages

Albanian

Native

English

C1 (Advanced)

Soft Skills

Leadership

Led technical project teams at university

Communication

Bilingual technical presenter (Albanian & English)

Adaptability

Rapid learner across various tech stacks

Collaboration

Team-focused with excellent interpersonal skills

Problem Solving

Analytical and driven under pressure
