Profile

Full-stack software engineer with a Bachelor of Computer Science from AAB University (graduated 2026, GPA 9.9/10). Backend developer and QA intern at Qeraja (remote). I build complete products end to end: two AI SaaS platforms, a paid e-commerce store for a client, an AI fact-checker with its own evaluation study for my thesis, and five live websites for brands and local businesses. Experienced across web, mobile, games, AI and IoT, and comfortable running a project from the first client call to launch.

Education

Bachelor of Computer Science – Professional Programming, *AAB University* 2023 – 2026 · Prishtina, Kosovo

- Graduated 2026 · GPA: 9.9 / 10
- Recognized for academic excellence and offered early job opportunities.

Skills

Programming Languages
Python, Java, Kotlin, C#, C++, JavaScript, TypeScript, Swift, PHP, SQL

Frameworks & Tools
React, Next.js, Node.js, Express, FastAPI, .NET, Unity, Tailwind CSS, Prisma, Vite, GSAP, three.js, Neon / PostgreSQL, MySQL

IDEs & Platforms
Android Studio, Xcode, Visual Studio, VS Code, PyCharm, Cisco Packet Tracer, Vercel

Expertise
Full-Stack Development, AI / LLM Integration, Web Animation & 3D, API Integration, IoT, Game Development, Database Design

Experience

Qeraja · Backend Developer & QA Intern (remote) present

- Backend and QA for Qeraja, a property platform where people list buildings for rent or sale and others find places to rent or buy.
- Building and improving API endpoints and services, working on performance, and testing the platform.

Freelance Web Developer · client websites and stores 2025 – present · naserdemiraj.is-a.dev/#websites

- **EG Electronics**, a paid e-commerce store: products, cart, authentication and orders, built with the client from requirements to a production release (React, TypeScript, Node.js, Neon).
- Client websites with their own CMS, so the owners update them themselves: **Rina Couture** (evening-dress boutique, 3D dress parade), **Bella Casa** (furniture showroom with invoices) and **MAMAJ** (handmade furniture); the last two built with a friend.
- Motion-rich demo sites with 3D, WebGL and scroll scenes: Golden Eagle (energy drink), Veranda (restaurant) and Kokrra (coffee shop); multilingual, with WhatsApp orders and bookings.

React, Vite, Node.js, three.js, GSAP, Neon PostgreSQL, Vercel Blob, Vercel

Projects

AI Receptionist · multi-tenant SaaS (own product) 2026 · github.com/NaserDemiraj/AiReceptionist

- Built a SaaS that gives any small business an AI employee for its website: it recommends products from a live catalog, captures leads, books appointments and hands over to a human agent.
- LLM tool-use loop (product search, knowledge search, lead capture, booking, human handoff) replying in each customer's own language, detected per message.
- Multi-tenant architecture with organization-scoped data, auth and per-business widget keys; PostgreSQL with pgvector; 100+ automated tests. Tested with a furniture store as the demo business.

Next.js, TypeScript, Prisma, PostgreSQL (Neon), Groq, Vitest

HumanFlow · AI writing platform 2026 · github.com/NaserDemiraj/AiHumanizer

- Full-stack platform to humanize, detect, check and rewrite text: 14 rewrite modes streamed token by token, chained operations and a word-level diff to accept or reject changes.
- Rewrites inside the original DOCX without breaking styles, tables or images; OCR for scanned files; batch processing; accounts, quotas and a public API with per-key rate limits.

Next.js 16, TypeScript, Prisma, Neon PostgreSQL, Groq

VerifyNews · AI fact-checker (BSc thesis) 2026 · fake-news-detector-thesis-topic.vercel.app

- Scores how credible an article is, from text, a link or a browser extension, using an LLM grounded in live web search with fallback across several AI providers; accounts, history and batch analysis.
- Evaluation study: a prompt-injection defense (no attack changed a verdict on the production model), tests in 8 languages, and a comparison with a classic baseline across two datasets.

C# / .NET 8, Next.js, Neon PostgreSQL, Docker, Python (evaluation)

Genesis · autonomous economic-agent simulation (private repository) 2026

- Built a Python/FastAPI system in which AI agents research, build and evaluate ways to earn money under a hard $20 capital ceiling that the double-entry ledger itself enforces.
- Deterministic risk engine that must approve every real-money action, sandboxed prototype execution and 500+ automated tests; no revenue is recorded without a payment the owner has verified.

Python, FastAPI, SQLAlchemy / Alembic, Playwright

IoT Drone Control · balancing quadcopter github.com/NaserDemiraj/Drone

- Built a drone around an ESP32, an MPU6050 IMU and four DC motors; a PID controller keeps it balanced on pitch, roll and yaw through PWM, and it returns to a stable hover after inactivity.
- FastAPI REST API and web interface for the flight commands; mock pin, PWM and sensor classes test the logic without the hardware.

Python, MicroPython, ESP32, FastAPI

3D Survival Game · solo, Unity github.com/NaserDemiraj/3D-UnityGame

- Built the whole game myself: an open world (forest, village, river, mountains) where you find hidden items before the timer runs out; game logic, levels and UI in C#, with realistic physics.

Unity, C#

Other projects

- **Contact Cleaner** (JavaScript): finds duplicate contacts Excel misses, entirely in the browser with no uploads; free edition plus a paid Pro. naserdemiraj.github.io/contact-cleaner
- **Psychologist Scheduler** (React, Node.js, Prisma): online session booking with patient, psychologist and admin dashboards.
- **AI Chatbot** (Python, Gemini API): real-time chatbot with a web frontend.
- **Online Voting System** (PHP, MySQL): sessions, user validation and OTP login.
- **Shopware 6 QA Automation** (Playwright, TypeScript): test plan, bug report and checkout tests.

Languages

Albanian
Native

English
C1 (Advanced)

Soft Skills

Leadership
Led technical project teams at university

Communication
Bilingual technical presenter (Albanian & English)

Adaptability
Rapid learner across various tech stacks

Collaboration
Team-focused with excellent interpersonal skills

Problem Solving
Analytical and driven under pressure
